- When lungs no longer oxygenate and heart can not perfuse the oxygen inspite of maximum efforts, the consequences are multi organ failure and loss of life. Till date we were helpless, but now **there is a ray of big hope brought for precious patients by CIMS Hospital.**
- Hundreds of lives are saved worldwide by ECMO system. Many sick patients are transported from peripheral hospital to tertiary care center with ECMO support every year.

Indicators for ECMO

1. Patients with reversible Cardiac or Respiratory pathology
2. Life-threatening acute respiratory failure with profound gas exchange abnormalities
3. ARDS & Respiratory failure
4. ECMO may be used as salvage therapy to rescue the patient
5. Acute Cardiogenic shock and post cardiac surgery
6. In newborns; meconium aspiration syndrome, persistent pulmonary hypertension, Congenital diaphragmatic hernia etc
7. Destination & Salvage Therapy in Severe Congestive Heart Failure
8. Complex Congenital Heart Disease
9. Portable Left Ventricular Assist Device (LVAD)
10. Pneumonia, trauma or primary graft failure following lung trans-plantation
11. In a veno-arterial configuration (either peripheral or central cannulation) for the treatment of heart failure.
