

CIMS Dermatology

PLATELET RICH PLASMA THERAPY (PRP)

Through PRP therapy stem cells are injected and that leads to new tissue formation.

How PRP therapy is performed?

In PRP, patient's own blood is withdrawn and platelets are separated from blood by specialized machine and then the separated plasma is injected back in to patient.

Indication

- ◆ Hair regrowth
- ◆ Scar treatment
- ◆ Facial rejuvenation

CIMS Dermatology department provides facilities in the following areas:

- ◆ Hair Transplant
- ◆ Chemical Peel
- ◆ Platelet Rich Plasma Therapy (PRP)
- ◆ Treatment of scars

HAIR TRANSPLANT

Hair transplant is a method through which patient's own hairs are transplanted form donor site to recipient site. Hair transplant is a permanent cure for patient having androgenic alopecia.

There are 2 methods for hair transplant

- ◆ FUE method(Follicular Unit Extraction) (Suture less technique)
- ◆ Strip method

No hospital stay is required for the procedure and patient can resume his work from the very next day.

BALDNESS is an ILLNESS.

Hair Transplant is a NECESSITY, not a LUXURY.

Visit CIMS - Skin (Dermatology) Department for Hair Transplantation by our Experienced Team!
