- CT Scan, MRI Scan, Ultrasound on same level & quickly accessible for trauma patient
- Trauma ICU 11 bedded manned round the clock by qualified anaesthetist

What is Trauma?

Trauma refers to any physical injury which can be simple to serious & life threatening. Any kind of trauma injury requires immediate care in a fully equipped trauma center in a state-of-the-art hospital.

GOLDEN HOUR The principle of trauma management

Time from injury to treatment	% Mortality
1 hour	10 %
2 hours	11 %
3 hours	12 %
4 hours	33 %
5 hours	36 %
6 hours	41 %
8 hours	75 %
10 hours	75 %

There was a genuine appreciation of the time factor between trauma and shock treatment. The mortality rate among patients who were treated within one hour was 10 % and it was increasing significantly with the delay in resuscitation of injured patient.

Quick management is the key to prevent loss of life or limb.

Dr. Pranav A Shah

MS (Ortho), DNB (Ortho), MNAMS
Fellowship in Advanced Trauma
(USA) & Canada
