CIMS Urology

Urology is the branch of medicine that deals with diagnosis and treatment of disorders of the urinary tract in men and women, as well as the study of the male reproductive system.

This includes diseases of the kidneys, adrenal gland, ureters, urinary bladder and urethra in both sexes and the prostate, as well as male sex organs.

Urinary tract infections, urinary tract stones, prostate disorder, cancer involving Urinary tract, involuntary loss of Urine, erectile dysfunction, Male infertility are treated under this branch.

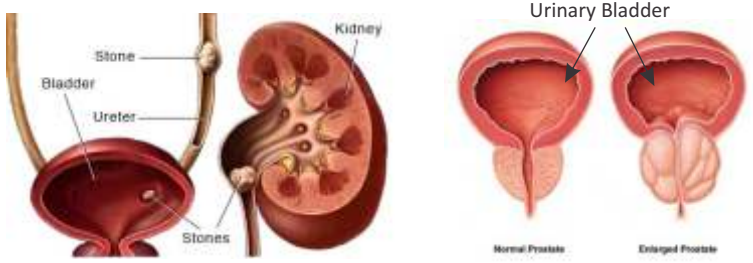

Urology at CIMS

CIMS has a dedicated treatment program for all urological procedures, skills and facilities to carry out laparoscopic (keyhole) surgery wherever possible.

CIMS urologists perform minimally invasive surgical procedures resulting in shorter hospital stays, less discomfort and bleeding, and a shorter recovery period including less time away from work and regular activities. These include minimally invasive surgery for kidney operations and endoscopic procedures used to diagnose and treat upper urinary tract disorders. Urologist at CIMS are dedicated to perform stone and prostate surgery even in high risk cardiac patient.

Our team of surgeons, specialty nurses and other support staff are committed to the highest level of patient care and their high level of skills will ensure a smooth management of urological problems and disorders.
